

BLINK-R BACnet Router

The OPEN General BLINK-R is a BACnet IP/MSTP router with on board RS-485 Repeater. It automatically transfers BACnet data from BACnet/IP to BACnet/MSTP. It is a plug and play device with easy network setup via simple web browser.

FEATURES

- Native BACnet Compatibility
- BACnet IP/MSTP Router
- 4 Port RS 485 Repeater
- Automatic Data Transfer between IP and MSTP
- Easy setup via web page
- Distributive communication legs for easier network troubleshooting
- Multiple Baud Rates
- USB Service port
- Universal power supply

The BLINK-R conveniently has built in 4 port RS-485 repeater to repeat communication signals. It accommodates distributive communication leg design for easier network troubleshooting. It supports multiple baud rates, selectable via simple dip switch. A USB service port is on board for network analysis.
